# Health

**Fresh Air Intake**

Air outside can be led into the room via a connection pipe, which keeps the indoor air fresh and healthy.

**Long-term Filter**

The latest long-term filter ensures better air quality. Meanwhile, the cleaning frequency has been decreased, and maintenance is also much easier.

# Comfort

**Anti-Cold-Air**

When starting the heating operation, the fan speed is regulated automatically from the lowest speed to the preset level. This function can prevent cold air from blowing out at the beginning of the operation, which avoids the discomfort to the user.

**Follow Me**

Temperature sensor built in the remote control will sense its surrounding temperature, so the unit can achieve accurate and comfortable temperature control just like the air conditioner is following you.

**Fast Cooling / Heating**

Startup at high frequency increases cooling/heating capacity and reduces time to reach set temperature, thus you can enjoy cooling and heating in seconds.

**Auto swing**

Distributes cool/warm air to maximum area by moving horizontal and vertical fags automatically.

**Independent Dehumidification**

With the independent dehumidification function, the unit can efficiently dehumidify the room and give you more comfort.

**3D Air Flow**

Combine vertical and horizontal auto swing to ensure an even distribution of air flow throughout the room.

**Dimmer**

Press this button to shut off the display light on the front panel.

**Silent**

Indoor fan will run at super breeze speed and indoor noise level can be extremely low when the unit enters silent mode operation.

# Reliability

**Self-diagnosis Function**

Once abnormal operation or parts failure happen, the unit will monitor the failures, the microcomputer of air conditioner will switch off and protect the system automatically when it happens. Meanwhile, the error or protection code will be displayed on the indoor unit.

**Low Ambient Cooling**

With special designed PCB, outdoor fan speed can be changed automatically according to condensation temperature. The air conditioner can run cooling operation even when the outdoor ambient temperature down to -15°C.

**Intelligent Defrosting**

Normal defrost function can only be operated in certain time, but AUX commercial air conditioner's intelligent defrost can start automatically according to the surrounding condition.

**Compressor Heating Belt**

Auxiliary heating belt can increase compressor oil temperature in winter and prevent defrosting water accumulated, which improves heat transfer efficiency.

**No Frosting Chassis**

The unique pipeline design makes the temperature on chassis higher than normal units, and it prevents defrosting water accumulated, which improves heat transfer efficiency and solves the drainage problem.

**Golden Fin**

Effectively prevent bacteria breeding and improve heat transfer efficiency. The unique anti-corrosive golden coating on the condenser can withstand the rain, salty air and other corrosive elements.

**Fire-proof Electric Box**

Electrical control box adopts new design, which can meet the higher fire safety requirement to prevent the internal fire due to the electric spark accident.

# Energy Saving

**180° Sine Wave Control**

With considerable advantages, DC Inverter 180° sine wave driving technology has much wider range of frequency and voltage, higher energy efficiency, more smooth running and lower noise.

**Full Process By DC Drive**

DC control, DC Compressor, DC indoor motor, DC outdoor motor, and DC Electronic expansion valve make low noise and high efficiency.

**Sleep Mode**

The function enables the air conditioner to automatically increase cooling or decrease heating 1°C per hour for the first 2 hours, then holds steady for the next 5 hours, after that it will switch off. This function maintains both energy saving and comfort in night.

**Hydrophilic aluminum fin**

The louvered hydrophilic aluminum foil has improved by more than 10%. There refrigerant inlet and outlet are separated, to ensure the sub-cooling and enhance the cooling capacity.

# Convenience

**24-hour Timer**

Users can turn on or turn off the air conditioner at any time in 24 hours with remote controller or wireless controller.

**Built-in Drain Pump**

The built-in pump can lift the condensing water 1200 mm upmost from the drainage pan.

**Dual side Drainage**

Both left and right sides of the indoor unit are possible for drainage hose connection, and it's easy for installation with this function.

**Digital Tube Display**

Easily for the running parameters checking and more convenient for troubleshooting, digital tube displays work status such as indoor temperature, setting temperature, the mode of operation, etc.

**Remote Control**

Help users to control the air conditioner easily, you can design your most comfortable settings with this controller.

**Wired Control**

Help users to control the air conditioner easily, the wired controller can be fixed on the wall and avoid mislaying. It's mainly used for commercial zone and makes air conditioner control more convenient.

**Central Control**

With the control function of weekly timer, zone (or group) setting etc., the centralized controller can control 64 units with RS 485 wire connection and the central control adapter.

**WIFI Control**

With the WIFI control, you can easily turn off the air conditioner outside your house via smart device. Furthermore, you can turn it on before you come back. The indoor unit filter can be taken off to wash easily and it keeps cleaning air all the time.

**Washable Filter**

The indoor unit filter can be taken off to wash easily and it keeps cleaning air all the time.

**Auto Restart Function**

If the air conditioner breaks off unexpectedly due to the power cut, it will restart with the previous setting mode automatically when the power resume.

# Inverter Series Free Match

# Free Match

## Environmental-friendly Refrigerant R32

The GWP value of R32 is smaller, so the effect on the greenhouse effect is smaller.  
The ODP value of R32 is 0, so it's no harm to our planet's ozone layer.

## Space-Saving Installation

Up to 5 indoor units can be connected to a single outdoor unit, which reduces the number of outdoor units required so as to save installation space. Besides, each indoor unit can be controlled individually and they even needn't be installed at the same time.

## Energy Saving

Cutting-edge DC inverter of sine wave control and active PFC technology realize low noise and economical operation.
